Don’t Hesitate, Vaccinate!

Three key reasons YOU should get the COVID-19 Vaccination.

The COVID-19 vaccination will:

1. Help keep you from getting COVID-19
   Getting a COVID-19 vaccine may help keep you from getting seriously ill even if you do get COVID-19, and getting vaccinated yourself may also protect people around you, particularly people who are at an increased risk for severe illness from COVID-19.

2. Be a safer way to help build protection
   The COVID-19 vaccination will help protect you by creating an antibody response without having to experience sickness. While some people may experience some side effects, the vaccine cannot give you COVID-19.

3. Be an important tool to help stop the pandemic
   The combination of getting vaccinated and following the CDC’s recommendations to protect yourself and others will offer the best protection from COVID-19. When enough of the population are vaccinated together we can stop the spread of the disease.
