

# NCCHC-HU COVID-19 Survey of Correctional Facilities: Weekly Report

Authors:

Professor Marcella Alsan of Harvard Kennedy School

Professor Crystal S. Yang of Harvard Law School

May 11, 2020

## National Commission on Correctional Health Care

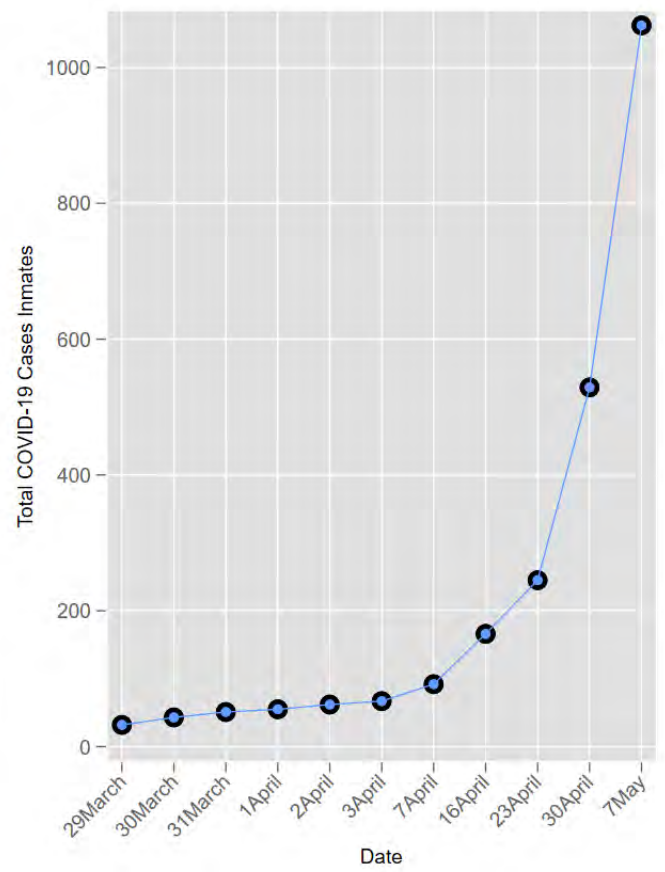

# 1 Summary

- Our initial survey closed on 3/25/2020. The first data were collected on over 300 facilities. Subsequently, a daily survey, approximately 3 minutes in length on average, was filled out by around 115 facilities per day beginning on 3/30/2020 and ending 4/3/2020. On 4/7/2020, we started a weekly survey, which was filled out by approximately 130 facilities. The most recent survey closed on 5/7/2020 and included roughly 192 facilities.<sup>1</sup>
- The data cover facilities across the country. The majority (70%) are jails, followed by prisons (20%), juvenile detention centers (5%) and other.
- **Noticeable** this week as well as last, an **uptick** in cases among inmates (a growth rate of 101%).
- **New** this week, a comparison with the Marshall Project's numbers of COVID-19 in prisons. The trends look generally the same - see the Appendix. The COVID-19 rate among prisoners according to the Marshall Project is 696 confirmed cases per 100,000 for the week of April 22. The NCCHC-HU data reveal a rate of 368 per 100,000 inmates.<sup>2</sup>.
- This week, reporting facilities reported innovative methods to protect staff and inmates including:
  - Prevention, containment, and control protocols.
  - A questionnaire to track where other staff work.
  - Sharing of statistics with other facilities.
  - Established a COVID-19 task force.
  - Full medical screening of all incoming inmates.
  - Virtual sick calls via an iPad.
  - Video court appearances and visitations.
- A question on cases confirmed by testing was added to the survey on April 7th 2020. To date, the data reveal that 15% (719 of 4,765) of inmates tested for COVID-19 are positive with 2,521 tests pending; 13% (346 of 2,618) of correctional officers tested are positive with 123 awaiting results and 8% (43 of 541) of health staff tested positive with 12 results pending.
- The data show that the number of reporting facilities that screen new inmates was initially very high (93%) and as of date, remains at 94%. The current inmate population screening has increased from 46% to 57%. Staff screening has also increased from 79% to 86%.
- Testing access initially was 64% and has increased to 85%
- To date, there have been 1,062 reported cases among inmates, 755 reported cases among correctional officers, and 124 reported cases among health staff.

<sup>1</sup>Caution should be used when interpreting these results since the facilities are not necessarily representative, it is a convenient sample of those who have been invited and able to participate (see the appendix for more information.)

<sup>2</sup>Source: <https://www.themarshallproject.org/2020/04/24/tracking-the-spread-of-coronavirus-in-prisons>. In the CDC MMWR - the ratio of infection in staff:inmates was .567. In the NCCHC-HU data the ratio is .827. Source:<https://www.cdc.gov/mmwr/volumes/69/wr/mm6919e1.htm>

### 1.1 Cumulative Cases
